Kobra 400 WB Cross Cut Paper Shredder

The **Kobra 400 WB** is a cross cut shredder designed to shred computer prints-outs as well as paper coming from the waste baskets of an entire office floor: just insert the paper into the dedicated throat or to empty the waste basket into the large hopper, and the impressive cutting knives, which are fed through an automatic feeding system with mechanical revolving flaps, shred everything into small chips, for great security and bulk reduction of the shredded material.
