The all NEW **Intimus 120CC5** is lightweight and has all new advanced I-Control, silentec, 2X2, ecologic and DLS. With the high quality and high performance that Intimus provides, this unit easily outranks the competition. Your guarantee of perfect safety and privacy.

The key to the success of this data shredder lies in the infeed behavior and the geometry of the cutting shafts. Both factors are vital for high performance and for the required shred size. The cutting shafts of the Intimus PRO data shredders are made of specially hardened steel. They are wear-free and can handle paper clips and staples. CDs, DVDs, floppy disks and plastic cards are shred with the same precision in a separate cutting unit. The use of two pairs of cutting cylinders reduces system load and guarantees long service life.

i-Control

System instantly informs the user of the shredder status: Child safety lockout, oil indicator, bin open, paper jam, bin full and motor overheat lights.

ShredderSource.com

Silentec

Innovative sound dampening system that produces whisper quiet operation; spring mounted shredder block absorb sound waves before you hear them.

2 X 2

Cut & Collect System segregates paper waste from CDs, plastic cards and diskettes; environmentally friendly recycle separation of paper and non-paper waste.

EcoLogic

Time-responsive electronics put the shredder into "sleep mode" after it has been idle for sometime, automatically reducing its power usage to zero.

DLS

Detects the paper volume as it is fed into the cutting unit. The result of this measurement is communicated to the user by changing colors; like traffic lights, of a light strip in the paper feed area.
